

The Public Works Department will begin our annual tree trimming along Township Right-of-Ways, as well as, in developed areas where trees, branches, and large limbs hang over the roadways creating a hazard for motorists and pedestrians.

Routine tree pruning provides a safer environment for all persons who walk and drive along the road and sidewalks throughout our community.

Large trees, limbs, and other vegetation can cause costly damages to vehicles, especially larger ones such as school buses, plow trucks, and trash trucks.

Pedestrians walking along walkways that have branches and limbs hanging down are then forced to walk around them at times and that may even mean walking on a busy street.

Pruning the dead, dying, or diseased branches help prevent further decay of the tree; trees also benefit from more sunlight and air circulation as a result from pruning. Tree pruning also deters pest and animal infestation and greatly improves their appearance and driving sight lines.

This work is to begin in January and will continue through the winter months, as weather permits.

Please calls us at (610) 495-6432 Ext. 320 if you have any questions. We thank you for your cooperation as we work to provide safe and clear travel paths for all.

**William R. Bradford
Public Works Superintendent**
