**Thank you,  
Tom,  
for 35  
Years of  
Dedicated  
Service**

**working  
to build  
a better  
community  
for  
everyone**

**Thomas J. Neafcy, Jr., Supervisor,  
Retires from Board**

## Message from the Chairman

**Kara Shuler**

**Chairman**

It is never easy to say goodbye, but we must do so to Supervisor Tom Neafcy, who is stepping down from the Board after 21 years of service. Prior to his tenure on the Board, Tom also served on the Township's Parks and Recreation Committee, Planning Commission, Zoning Hearing Board, and Emergency Management Committee. His contributions to Limerick total 35 years. Many community-wide amenities that we now enjoy, such as the award-winning Limerick Community Park, are attributed to his service.

His dedication to parks, open space, and trails remained consistent during his time on the Board and also the eight years that he served on the Township Grant Committee. His efforts contributed greatly to the more than \$15 million in grant funding the Township achieved during his years of service. The most notable success came in 2007 when Limerick was awarded \$2.4 million to assist with the purchase of the Kurylo Preserve on North Limerick Road. This 80-acre open space parcel is now improved with a wonderful trail that connects to Limerick Community Park. It is also part of an overall 8-mile trail network that has been under construction since 2013, for which the Township has received approximately \$1.5 million in grant funding.

Tom has been a strong supporter of our Police, Fire, and Emergency Service providers and the public safety services they provide. As calls for service increased with the growth of the community over the past three decades, Tom was always out-front advocating for our Emergency Service providers to ensure they had the necessary funding, equipment, support, and staffing to serve this growing community.

Tom's positive contributions to this Township will provide far-reaching benefits to our current residents, and also to those who will someday call Limerick their home.

On behalf of the entire Limerick organization, I extend our thanks for your service and contributions to this community that will endure for many years to come.

I also wish you all a Merry Christmas and wonderful Holiday Season,  
and my best wishes for the New Year.

*Kara Shuler*

## Township Building Holiday Office Hours

The Township Building & Administrative Offices will be  
CLOSED on the following dates in observance of  
Christmas Eve, Christmas Day, and New Year's Day:

***December 24<sup>th</sup>, 27<sup>th</sup>, and 31<sup>st</sup>***

***Note:*** The Board of Supervisors will meet for their  
reorganizational meeting on ***Monday, January 3, 2022 at 7:00PM.***

# Thomas J. Neafcy, Jr.—Farewell

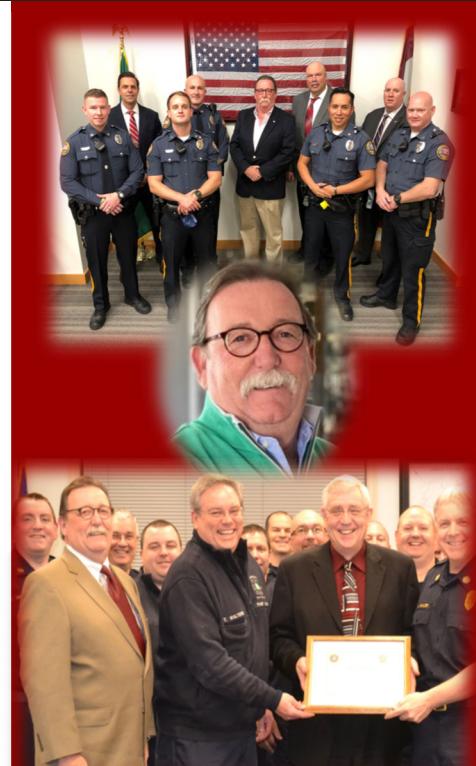

Thomas J. Neafcy, Jr. has served Limerick Township in various capacities, beginning in the mid-1980s. During his tenure, he served on the Zoning Hearing Board, Planning Commission, Grant Writing Committee, and Emergency Management Committee. Most notably, he served on the Board of Supervisors for 21 years.

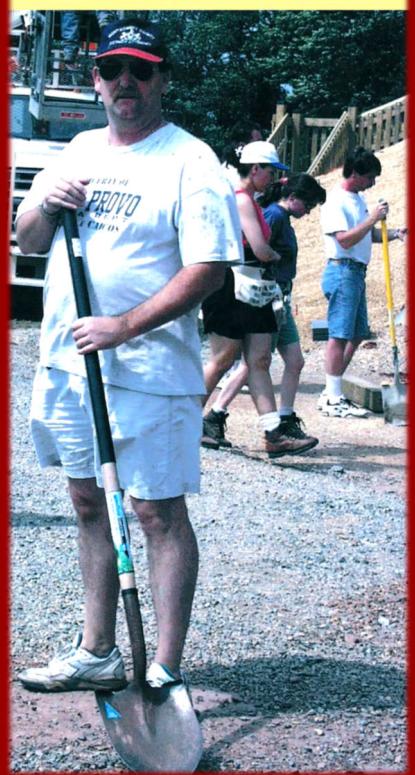

He has been an upstanding community servant, encouraging the advancement of many successful projects that the community now enjoys today.

Tom has been an advocate for improvements to the Township's Parks, Open Space & Trail System and a supporter of public safety and our first responders. He was a responsible steward of the community's tax dollars and utilizing grant funding to accomplish long-term capital projects.

We thank Thomas J. Neafcy, Jr. for his accomplishments and service to this great Township and wish him nothing but the best in the future!

Manderach Playground Construction 1998

## NEW WESTBOUND 422 RAMP AT SANATOGA NOW OPEN

In November, the Township completed construction of the new Route 422 Westbound Ramp at the Sanatoga Exit on schedule and ahead of the busy holiday shopping season.

Motorists wishing to travel West on Route 422, will no longer need to make a left-hand turn across oncoming traffic, thereby improving traffic safety.

The Township thanks Lower Pottsgrove Township, who partnered with us for the design, construction, & required grant funding match - all of which were pivotal in bringing this \$1.509 million project to reality.

Both municipalities have begun preliminary planning for an Eastbound Route 422 off-ramp, once again joining together to seek grant funding to cover the majority of the estimated \$4 million project. This second ramp is necessary to allow for anticipated future growth in both Lower Pottsgrove and Limerick Townships.

***“Long-term planning is a bedrock of the Limerick Township organization and has resulted in many positive improvements to our community, such as this new ramp.***

***We thank Lower Pottsgrove for their support and look forward to working with them again, as both municipalities work pro-actively to address the future challenges facing the Route 422 corridor,” states Kara Shuler, Chairman, Board of Supervisors.***

***Photo courtesy of Traffic, Planning, and Design, Inc.***

### 3 Easy Ways to Stay Informed on What's Happening in the Township

### GOING GREEN AND SAVING GREEN

### L.E.D. CONVERSION STREETLIGHT PROJECT

Limerick Township is excited to announce a green-initiative project that is under way. The Township is participating with the Delaware Valley Regional Planning Commission in a streetlight buyback program. Under this program, the Township is replacing all existing High Pressure Sodium streetlights within its boundary with energy-efficient L.E.D. lighting.

This conversion will result in an estimated **\$40,000 ANNUAL savings to the Township.**

Additional long-term benefits of the L.E.D. conversion include reducing greenhouse gases by 27.1 metric tons per year, creating uniform lighting standards to increase safety for residents and motorists, and lowering annual maintenance costs.

LEDs have a more efficient lighting pattern that reduce glare and focus the light directly on the area to be lit.

### While on the Topic of Power & Lighting... A Reminder from the Code Services Department:

**ELECTRICAL PERMITS require that all Electrical Inspections and Plan Reviews are to be conducted by a Third-Party Electrical Inspection Agency.**

Electrical Permit Guidelines and a list of our current Third-Party Electrical Inspection Agencies can be found on our website under Code Services—Applications & Forms at

[www.limerickpa.org/161/Applications-Forms](http://www.limerickpa.org/161/Applications-Forms)

Commercial projects require signed and sealed electrical plans by an architect or engineer, licensed in Pennsylvania, unless otherwise directed by the Limerick Township Code Official.

Adhering to these guidelines will help expedite the permit process.

*"The addition to, alteration of, replacement of, or relocation of any electrical wiring or receptacles will require a permit."*

# Parks & Recreation

For detailed information on all Limerick Township Parks & Recreation events, programs, camps and more, please visit the Township website at:

[www.LimerickPA.org /155/-Recreation](http://www.LimerickPA.org /155/-Recreation)

## Community Events

## Community Organizations Donate over \$26,800 for Parks & Rec Programs

*Limerick Township thanks these organizations for their continued partnership and contributions to our community!*

Limerick's partnership with both the Spring-Ford Chamber of Commerce and the Spring-Ford Area Rotary Club has garnered \$26,800 in donations to support camps for children, senior programs, and maintenance of the Community Park.

At the October 19<sup>th</sup> Board of Supervisors' meeting, members of the Spring-Ford Chamber of Commerce were in attendance to present a check to Limerick Township in the amount of \$7,800 for funds raised from the 2021 Community Day.

At the November 16<sup>th</sup> Board of Supervisors' meeting, members of the Spring-Ford Area Rotary Club were in attendance to present a check to Limerick Township in the amount of \$19,000 for funds raised from the 3<sup>rd</sup> Annual Limerick Uncorked event.

Both events were held at the Limerick Community Park.

## Christmas Tree Recycling

Christmas trees may be dropped off for recycling at the designated area at the Limerick Community Park

**12/26 thru  
01/31**

*Please remove all

Ornaments*

### PUBLIC WORKS DEPARTMENT WELCOMES NEW EMPLOYEE

#### Cody Robbins, Public Works:

Cody started with the Township's Public Works Department in November and brings over six years of Public Works experience.

When asked what interested him in the position, he stated, "Limerick is a top-tier Township and I'm looking forward to growing my career and skills here with this highly-skilled team".

Cody is also a high school football coach and enjoys spending time with friends and family in his free time.

# Emergency Management News

On November 16<sup>th</sup>, Limerick Township's Emergency Operations Center (EOC) Staff once again participated in the Limerick Generating Station Preparedness Drill. The Township EOC staff is comprised of members of the Limerick Fire Department, Police, EMS, a ham radio operator, Public Works and Administrative Staff, as well as the Township's Emergency Management Department.

The entire EOC Staff is trained to effectively carry out a situational response, as simulated County-wide during this Preparedness Drill, which was evaluated by all levels of governmental agencies, including FEMA, PEMA, and Montgomery County.

*As a host municipality, both the Township and its residents need to be aware of what to do in a real-life emergency situation arising at the power plant.*

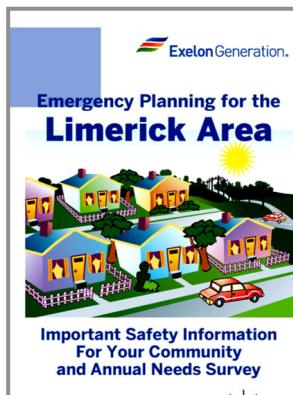

## What You Can Do & What You Should Know To Be Prepared

- Sign up for Ready MontCo alerts!

### Be Alert • Be Informed **READYMONTCO**

- Read and be familiar with the information provided in the Exelon Emergency Planning Guide, which is mailed out to all residents every 2 years.

- Know what radio and TV stations to tune into if you hear the Emergency Sirens activated.
- Register for assistance if you have access and/or functional needs.

# WINTER REMINDERS

## Snow Emergency

**DO NOT**  
DRIVE UNLESS IT  
IS ABSOLUTELY  
NECESSARY.

If a State of Emergency is called, please stay off the roads so the plows can do their job without any increased danger.

To prevent your driveway from being plowed in, please follow the diagram below provided by PennDOT

## Municipal Separate Storm Sewer System (MS4) WINTER UPDATE

**Tips for protecting our local streams and creeks this winter**

- 1) Dispose of shoveled snow in vegetated areas. This will allow the snow to infiltrate, instead of becoming stormwater runoff. Never dump into streets or waterways.
- 2) Use de-icing chemical and salts sparingly. Focus on making your walkways and driveways safe, but try to avoid overusing or spreading in vegetated areas or near waterways. Sweep up any extra salt left over before it runs into storm drains.
- 3) Shovel as soon as possible after a snowstorm. As a result, less ice will form and you won't need to use as much salt or de-icer.
- 4) Plant native, salt tolerant species near paved areas. Not only will these species be able to survive despite the salt, they will also reduce stormwater runoff.

# Emergency Planning for the Limerick Area

## Important Safety Information For Your Community and Annual Needs Survey

# 2018/2019

**CURRENT VERSION  
ON MONTCO WEBSITE**

Please read the entire brochure or have someone translate it for you. Discuss this information with members of your family, and then keep the brochure in a convenient place for future use.

### **ESTA INFORMACIÓN ES IMPORTANTE**

Por favor lea este panfleto o busque a alguien que se lo lea. Comparta esta información con su familia y mantenga este panfleto en un lugar conveniente para un uso futuro. Si necesita obtener copia de este panfleto en español, por favor llame al Centro Hispano Daniel Torres, al 610-685-1264.

# What to Do in an Emergency

## Monitor and Prepare

Tune your radio or TV to one of the stations listed in this brochure. Monitor the radio and TV for emergency information and follow emergency instructions. People should prepare for possible evacuation (e.g., reunite with family members, assemble emergency kits, provide for pet needs, keep off of the road as much as possible).

## Keep Phone Lines Open

*Please do not make unnecessary phone calls.* Leaving phone lines open for emergency workers will help everyone involved. If you require assistance, call the emergency phone numbers broadcast on the radio or television.

## Shelter-in-Place

Go indoors and stay there. Close all doors and windows and shut off any systems that draw in outside air, such as furnaces, fireplaces and air conditioners. Keep listening to the radio for updates. Keep pets inside and shelter farm animals. If traveling in a vehicle, close windows and vents.

## If Instructed to Evacuate

In an evacuation, people in the affected area will be asked to go to local reception centers listed within this brochure. After this, they can stay at specified mass care centers or with friends or relatives outside the evacuation zone.

*Please do not try to pick up children or others at schools, hospitals, nursing homes or overnight campgrounds.* These facilities will be following their own special emergency plans, and you would most likely miss connections. If evacuated, students, hospital patients and nursing home residents will be accompanied to relocation centers where their needs will be addressed. To find out where people are being moved, stay tuned to the radio.

Plan for three days away from home, locking up and turning appliances off as you would for a weekend vacation. Pack all necessary items (see "Emergency Supplies"). Evacuate everyone in your home, following directions given on the radio. These routes will have been selected as the safest ways out of the affected area.

## Shadow Evacuation

People should only evacuate when instructed to do so. Evacuation of individuals not within the declared evacuation area could impede evacuation traffic flow. Monitor the radio and prepare to follow instructions.

## Staged Evacuation

You may be instructed to shelter-in-place until people in a higher risk area are evacuated. Monitor the radio and prepare to follow instructions.

## Information for Farmers

When advised to do so, remove all livestock from pasture, shelter if possible, and provide them with stored feed and protected water. The county U.S. Department of Agriculture representative will provide further instructions regarding the protection of livestock and foodstuffs.

## School Information

If your child's school is in session at the time evacuation is recommended, children attending schools located within the emergency planning zone will be transported to designated host schools outside the area. They will remain under supervision until reunited with parents or guardians. These host schools have been planned to coincide with main evacuation routes. Children whose

homes are inside the emergency planning zone, but who attend school outside the emergency planning zone, will not be sent home if an evacuation is recommended. They will remain at the school under supervision until picked up by parents or guardians. See the "County-specific School Information" within this brochure or contact school officials for more information.

### Non-Public School and Day Care Information

Parents and guardians with children attending non-public schools or at day care facilities within the emergency planning zone should become familiar with the facilities' emergency plans. Contact the facility operator for more information.

## How to Prepare for an Emergency

You never know when you might have to leave your home on short notice. A nuclear incident is only one possibility. Floods, fires, chemical spills or severe illness could occur at any time. Preparing now will help you respond more quickly in any emergency.

### Emergency Kit

Keep an emergency kit – portable radio, flashlight, extra batteries, extra car keys, first aid kit and other items – in a special place that the whole family can easily locate. Include this booklet in your emergency kit with your location marked on the map. Write a list of the items you would want to take if you had to leave home quickly and post the list in a convenient spot. Be sure to keep a supply of all the items on your list. Gather any important documents that you might need in an emergency and keep them together in a safe place that you can access quickly and easily.

### Transportation

Maintain your vehicle in good running order and keep the gas tank at least half full at all times. **If you will need transportation in an emergency, use the attached reply card to notify local authorities now.**

### Pets

Service animals will be permitted inside reception centers or shelters.

Pet sheltering information will be available at the reception centers and shelters for your area.

Contact your respective County Emergency Management Agency for additional information.

## Emergency Supplies

- General first aid kit and any special medication
- Cash, credit, or ATM cards
- Important documents
- Change of clothing
- Personal health products (toothbrush, eye care, sanitary products, etc.)
- Baby formula, diapers, car seat, toys
- Special dietary foods
- Pet related supplies

## People with Access & Functional Needs

The information gathered by this survey is CONFIDENTIAL. Your county emergency management agency (EMA) and emergency services personnel utilize this information for emergency response planning.

Those with impaired sight, hearing or mobility might have difficulty responding to an emergency.

If you, someone in your household or someone you know who lives in the emergency planning zone will need assistance in an emergency, please notify your county EMA today. Simply fill out and mail the attached reply card. It is postage-paid, so you don't even need a stamp.

**This information is updated annually. Please return this survey even if you have previously responded. If you prefer, you may contact your local EMA directly. Area agencies are listed elsewhere in this pamphlet.**

**Berks County residents please complete the on-line survey at [www.berksdes.com](http://www.berksdes.com) or call 610-374-4800 x8206 in lieu of using this reply card.**

Local officials may contact you for additional information.

**Please check "yes" or "no" for the following questions:**

# Nuclear Power and Public Safety

## Benefits and Potential Risks of Nuclear Power

Used properly, nuclear fission (the “splitting” of uranium atoms) is a safe, dependable source of electricity. It is reasonable, though, to be concerned about what might happen in the event of a serious incident at a power plant.

A power plant reactor cannot produce a nuclear explosion. The uranium fuel contains very little fissionable material. As for radiation, the complex structure of a nuclear power plant is designed to prevent the release of radiation. A serious incident, however, could allow some radiation to escape and be carried away from the plant by the wind. The degree of risk to the public would depend on the size of the plume, the direction and speed of the wind, and other factors.

## Emergency Planning for the Limerick Area

Special plans have already been developed to protect the public in the event of a nuclear incident in your area. These plans give specific attention to people who – like you – live, work or visit within 10 miles of a nuclear power plant.

Procedures are in place to help protect you and other members of the public in the unlikely event of a nuclear emergency. If necessary, area officials would declare an emergency and take measures to ensure public safety.

This pamphlet addresses procedures for the Limerick area. Please read and keep this material for future reference. Although it specifically addresses a potential nuclear accident, much of the information is useful in any major emergency.

### *Warning Sirens*

If you hear a siren, you should tune to one of the Emergency Alert System (EAS) stations listed in this brochure for official information.

The sirens are full volume tested semi-annually in June and December. A monthly test is also conducted which operates the sirens for less than one minute.

A siren may malfunction and inadvertently sound. If you feel a siren is malfunctioning, please contact your county emergency management officials at the numbers below:

Berks County (610) 655-4921

Montgomery County (610) 631-6530

Chester County (610) 344-5000 or (800) 732-1580

### *Public Inquiry Telephone Numbers*

Berks County (610) 320-6150

Montgomery County (610) 631-3000

Chester County (610) 344-6480

TTY/TTD (610) 344-4785

### *Shelter-in-Place or Evacuation*

Officials might recommend that people either take shelter indoors or evacuate an area. It is critically important that you follow the recommended course of action. Staying home when instructed to evacuate or driving around when urged to stay indoors could expose you to danger unnecessarily.

**NOTE: If you or someone you know might not respond to warning sirens or radio broadcasts due to impaired hearing or other factors, please use the attached reply card to notify local authorities now.**

## **Potassium Iodide (KI)**

Potassium Iodide (KI) is a nonprescription drug that may prevent the thyroid from absorbing radioactive iodine. KI is one type of protective action that may be recommended during a nuclear incident. KI should only be taken at the direction of the appropriate state and local authorities. Consult your physician if you have concerns about the safety of KI for your child or yourself. KI is effective in blocking the absorption of radioactive iodine only. Since it does not block the absorption of any other radioactive material, evacuation or sheltering in place may be the most effective and preferred protective actions. Residents living within the 10-mile radius, who have not already done so, may obtain more information about KI or obtain KI by contacting:

**Pennsylvania Department of Health at 1-877-PA-HEALTH or  
[www.health.state.pa.us](http://www.health.state.pa.us)**

## **Classification of Accidents**

There are four accident classifications used to describe nuclear emergencies. We contact federal, state and local authorities in each of the following situations:

**UNUSUAL EVENT** — Events are in progress or have occurred which indicate a potential degradation of the level of safety of the plant or indicate a security threat to facility protection. No releases of radioactive material requiring off-site response or monitoring are expected unless further degradation of safety systems occurs.

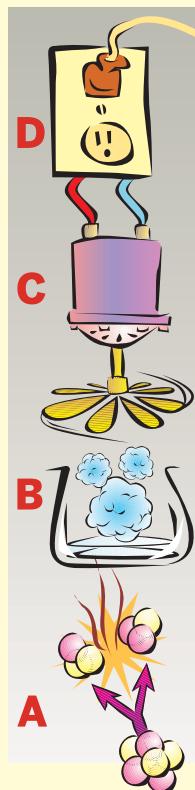

**ALERT** — Events are in progress or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of intentional malicious dedicated efforts of a hostile act. Any releases are expected to be limited to small fractions of the Environmental Protection Agency (EPA) Protective Action Guideline exposure levels.

**SITE AREA EMERGENCY** — Events are in progress or have occurred which involve actual or likely major failures of plant functions needed for protection of the public or security events that result in intentional damage or malicious acts: (1) toward site personnel or equipment that could lead to the likely failure of or; (2) prevents effective access to equipment needed for the protection of the public. Any releases are not expected to result in exposure levels which exceed EPA Protective Action Guideline exposure levels beyond the site boundary.

**GENERAL EMERGENCY** — Events are in progress or have occurred which involve actual or imminent substantial core degradation or melting with potential for loss of containment integrity or security events that result in an actual loss of physical control of the facility. Releases can be reasonably expected to exceed EPA Protective Action Guideline exposure levels off-site for more than the immediate site area.

# What You Need to Know About Nuclear Power Plants and Radiation

## How Do Nuclear Plants Work?

Power plants create electricity by running steam turbines, which are powered either by fossil fuels – coal, oil, natural gas – or by nuclear power. Nuclear technology produces energy by splitting uranium atoms in a process called fission. (A) Fission generates heat that (B) boils water for the steam that runs the (C) turbines, which produce the (D) electricity that we all use – making, for instance, (E) toast for breakfast.

In a nuclear power plant, pea-sized uranium pellets are stacked inside long, thin fuel rods, which are grouped in “assemblies” inside a reactor “core.” The core is encased in a very thick steel capsule, and the entire reactor is further protected by an airtight steel and concrete building called a “containment.” This complex structure is designed to help ensure the safe utilization of nuclear power.

## How Do We All Benefit From Nuclear Power?

Any fuel used to produce energy also produces waste. By-products of coal-burning include smoke, ashes and slag. Even with the latest technologies, it is impossible to prevent some of this waste from reaching the environment outside the power plant. Nuclear power generation, on the other hand, produces waste primarily in the form of spent fuel, which is not released into the environment. Besides helping to protect the environment, nuclear energy is also highly efficient, producing vastly more energy for its weight than coal or oil. We would have to burn more than 120 gallons of oil or up to a ton of coal to produce the same amount of energy as that found in a single pellet of uranium.

## What Is Radiation?

Radiation is energy in the form of rays or particles. Some atoms – the ones we call radioactive – are unstable. As they go through a natural process called “decay” in which they change into a stable atom, they throw off rays or particles called radiation. Radiation is exactly the same, whether from nature, or medical or industrial activities.

Radiation is measured in millirems. On average, a person receives about 300 millirem of radiation annually from natural sources and another 300 millirem or so from X-rays and other medical procedures. It takes more than 35 times this much – over 20,000 millirem in a single day – to produce identifiable effects in the body. Federal regulations allow workers to receive up to 5,000 millirem of radiation in the course of a year’s work.

# Evacuation Routes

Know your location on the map and mark it. Some primary evacuation routes are listed below. In an emergency, follow the directions given on the radio or TV, even if different from those shown below. Broadcasted directions will be based on actual road and weather conditions and wind direction – helping to ensure your safety as you leave the evacuation area. Report to the identified reception center. If you need a temporary place to stay, the center will provide directions to a mass care center nearby. For those who require transportation assistance, call the transportation assistance numbers listed below for your area.

# Evacuation Routes/ Reception Centers/ Transportation Assistance Numbers

## Berks County

### Amity Township (Amity Gardens)

**Evacuation Route:** Take Route 422 West to the reception center.

**Reception Center:** Exeter Township Building, East of Reading.

**Transportation Assistance Number:**  
(610) 689-6000

### Amity Township (East)

**Evacuation Route:** Take Route 662 North to Route 73 East to reception center.

**Reception Center:** Oley Valley High School, Oley.

**Transportation Assistance Number:**  
(610) 689-6000

### Boyertown Borough

**Evacuation Route:** Take Route 73 West to reception center.

**Reception Center:** Oley Valley High School, Oley.

**Transportation Assistance Number:**  
(610) 369-3028

### Colebrookdale Township

#### (West of Route 100)

**Evacuation Route:** Take Route 73 West to the reception center.

**Reception Center:** Oley Valley High School, Oley.
